Journey to Island Formation
Join us on a totally unique and interactive journey into the heart of the Maldives and discover how these groups of paradisiacal islands were created. Our Leisure Concierge will guide you through the 5 stages of island creation from initial formation to a modern day environmental resort. Along the way you will physically and visually explore the features of each stage. Be transported by natural currents through island channels, snorkel at each stage and understand the varying flora and fauna of the differing periods in the life of an island. Lunch will take place on an uninhabited desert island before visiting an inhabited island to discover the real Maldives.
