ENJOYING YOUR CIGAR

The smoke from a cigar should not be inhaled; pleasure should be derived from the flavor and aroma of the smoke being swirled inside your mouth. Your cigar should be smoked slowly. By smoking your cigar too quickly, you will introduce harsh, bitter flavors that will spoil the cigar.

As you continue to smoke your cigar, you will notice that the flavor continually changes. This is because the smoke that you are pulling through the remaining tobacco is intensifying the flavors.

Cuaba Divinos 3.9” Ø 42

The Hand Made Cuban cigar darker wrappers give a slightly sweeter taste with hints of spice and underlying earthy tones that are very pleasing. A good, Hibiscus to a sweet and Smokey finish leaves you wanting another one.

Shisha / Hookah / Waterpipe 水烟

Shisha is known by different names around the world and also commonly called Hookah and water pipe.

This is a Middle Eastern smoking tradition that began hundreds of years ago before the onslaught of cigarette companies. It is a pipe with a long, flexible stem that allows the smoke to be cooled by being made to pass through water.

Shisha is tobacco soaked in molasses, and then flavored with natural ingredients and perfumes. It is then smoked through a water pipe. The water is said to filter out some of the harmful aspects of the smoke.

Shisha tobacco comes in a variety of various fruity flavours:

- Mint
- Apple
- Cherry
- Blueberry
- Arabian Coffee

**Tobacco Alternatives**
