

Our Heritage - The Royal Villa

Constructed as a royal villa for the family of a former prince, HRH Prince Norinractevong, house number 55, Street 178 was built in 1900 in the heart of Phnom Penh city. It became the prince's sole residence after his marriage to HRH Princess Norodom Bopha Devi. Unfortunately, the marriage didn't last and the residence was turned into various offices. From 1991 to 1994, it served as the mission office for the United Nations when the United Nations Transitional Authority in Cambodia (UNTAC) was formed following the 1991 Paris Peace Accords.

During this period part of the villa was turned into a coffee shop called Cafe No Problem, and there was a splendid wooden bar in the anteroom that served generous vodka tonics, with pillows all around so you could sit on the floor at low tables. With time, the villa was abandoned and no records have been found to say what became of it, except for the memories of the community.

After several years, in 2016, Chip Mong Group and Hyatt Hotels Corporation signed a management agreement to bring the first Hyatt Regency brand to Phnom Penh. The Royal Villa was carefully restored to its former glory and now serves as the hotel lobby of Hyatt Regency Phnom Penh, which opened its doors to the public in 2021.

Hyatt Regency Phnom Penh exists as a lasting legacy of the Royal Villa and represents the old and new Phnom Penh, keeping Khmer traditions alive amid a new era that will inspire well-travelled and creative-minded guests to continue their journeys.

MARKET
CAFÉ
