# A COSMIC EXPERIENCE

**M**ore than 1,000 years ago, voyaging Polynesians were guided to the Hawaiian Islands with the help of the stars. Now you can view those stars and much more using Hawaii's only recreational telescope known as "Great White". This 16-inch reflector telescope is more than nine stories up, on a remote site of the hotel rooftop. Our Director of Astronomy uses a computer to select an agenda, and locate and identify 1,000 objects in the sky including stars, planet, galaxies and nebulae. Participants first learn to interpret the sky with the unaided eye, then giant astronomy binoculars before they use "Great White".

**F**or a romantic end to a perfect day in paradise, share champagne and chocolate covered strawberries during the couples only Tour of the Stars showings at 11pm on Fridays and Saturdays.

**C**ome share a cosmic experience at Tour of the Stars. Seating is limited to ten "gazers" to allow optimum viewing. Private shows are available.
